					SPECIAL SCORE	TOTAL SCORE

© 1967 BY THE UNIVERSITY OF MICHIGAN LIBRARY

HOW TO SCORE

1. Mark (✓) each valid entry; cross out each invalid entry.
2. Count the valid entries in the first column ("Writers, Fiction") and mark an equal number of blocks *consecutively* on the first column of the Scoring Table. Multiply the total number of marks in that column by itself (square the number) and write the resulting number in the box beneath the column.
3. Repeat Step 2 for each of the remaining columns.
4. Total the marks for each horizontal row; square this figure and write the result in the box immediately to the right of the row.
5. Add the numbers in the boxes along the bottom of the Scoring Table and place the total in the box marked "Special Score".
6. Add the numbers in the boxes at the right of the Scoring Table and record the result in the box marked "General Score".
7. Add the Special Score to the General Score and write the total in the "Total Score" box.

The **SPECIAL SCORE** is a comparative index of the depth of a player's factual knowledge and of his ability for quick recall within specific classes of subject matter.

The **GENERAL SCORE** is a comparative index of the depth of a player's factual knowledge and of his ability for quick recall across many different and unrelated classes of subject matter.

The **TOTAL SCORE** is strictly a numerical value which gives a comparative index of a player's ability to complete more valid Playcard entries than any other player.
