How to use this Chart:

1. Find the amount of gain or loss down the left side of the Chart. Find the number of Certificates you have in the affected Investment along the top of the Chart. Cross-index the two to find the total gain or loss. Add three zeros (000) to the number. For instance, 1,200 is really $1,200,000.
2. If you have more than ten Certificates, use the Chart twice, using the ten column and then the appropriate column that corresponds to the amount of Certificates over ten you have. For instance, if you have 14 Certificates, you would use the ten column and then the four column. If you have over twenty Certificates, use the ten column twice and then the appropriate column that corresponds to the amount of Certificates over twenty you have, etc.
